

Alex Zaplavskyi

JS Software Developer

Profile

Innovative **Frontend Engineer** experienced in building scalable, high-impact web applications for enterprise clients. Proven ability to leverage modern technologies such as **React, TypeScript, and 3D web frameworks** to solve complex business problems.

Delivered solutions that **improved mobile conversion by 30%, reduced load times by 25–30%**, and engineered platforms processing **over \$2M in monthly transactions**. Secured major client contracts through rapid prototyping and technical demos.

Creator of an interactive [3D resume game](#) that **increased HR engagement/response rate by 30%**, showcasing a strong blend of technical skill and creative problem-solving.

Employment History

Peoplevibe (Outsourcing Company) — Frontend Engineer

October 2022 - Present | Warsaw, Poland (Remote)

Key Projects:

- **HR Management Platform (Enterprise, UK client)**
Tech Stack: React, TypeScript, MobX, REST API
 - Built reusable form components and dynamic data tables with server-side pagination.
 - Optimized component rendering, improved load times by 30%.
 - Implemented data fetching and caching logic using SWR.
- **E-commerce Platform Redesign (Enterprise, US client)**
Tech Stack: React, TypeScript, Redux Toolkit, Sass, Stripe API, Shippo API
 - Engineered a performant and scalable e-commerce frontend platform handling \$2M+ in monthly transactions, improving mobile conversion by 30%.
 - Optimized bundle size, improving page load time by 25%.
 - Architected a product catalog with advanced filters and a secure multi-step checkout flow.
- **Rapid Prototyping & Client Demos**
Tech Stack: React, React Three fiber, Three.js, TypeScript
 - Developed a 3D product configurator prototype for a furniture retailer, helping secure a major project contract.
 - Delivered multiple interactive demos to communicate technical feasibility and design potential to clients.
