

Alex Zaplavskyi

Full-Stack Engineer | SaaS · React · Next.js · Three.js

👤 Profile

Full-Stack Engineer specializing in production-ready **SaaS platforms, high-conversion e-commerce systems**, and interactive **3D web applications**.

I build **fast, scalable**, and **maintainable** software across the full development lifecycle, from architecture and rapid prototyping to production deployment. Experienced in integrating payment, authentication, shipping, REST, and **AI services** to deliver complete business solutions. Delivered enterprise e-commerce applications processing **\$2M+** in **monthly transactions**, increased **mobile conversion** by **30%**, and **reduced application load** times by up to **30%**.

Comfortable **taking ownership of complex features** and collaborating with **cross-functional teams** to ship reliable, **production-ready software**.

🏢 Employment History

Peoplevibe — Full-Stack Engineer (US & UK)

London, GB, Warsaw, PL (Remote)

Key Projects:

- **Headless SaaS & E-commerce Platform Redesign (Enterprise, US client)**
Tech Stack: Next.js, TypeScript, Redux Toolkit, Sass, Stripe API, Shippo API, OpenAI API
 - Re-architected a legacy platform into a modern headless SaaS e-commerce platform processing \$2M+ in monthly transactions, boosting mobile conversion by 30%.
 - Implemented an automated AI-driven features engine (using OpenAI API) to enhance user experience and automate product workflows.
 - Optimized bundle sizes and asset loading, slashing application page load times by 25%.
 - Architected a complex product catalog with advanced dynamic filters, multi-tier subscription billing via Stripe, and a secure multi-step checkout integrated with Shippo API.
- **HR Management Platform (Enterprise, UK client)**
Tech Stack: React, TypeScript, MobX, SWR, REST APIs
 - Optimized complex React component rendering lifecycles, improving application load times by 30% .
 - Implemented efficient server-side data fetching, caching, and revalidation logic using SWR to minimize network overhead .

Skills

Core

JavaScript (ES6+), TypeScript
React, Next.js, Node.js, Express

State & UI

Redux Toolkit, MobX, Zustand
Tailwind CSS, shadcn/ui, SCSS

AI & Integrations

OpenAI API, Claude, Gemini,
REST APIs, Stripe, Clerk, Supabase

3D

Three.js, React Three Fiber, GLSL,
Blender

Interactive 3D Resume

Tech Stack: JS, Three.js, Blender

Created an interactive [3D resume game](#), showcasing advanced Three.js and WebGL techniques, interactive UX, and custom scene logic.

Languages

English: C1

Ukrainian: C2

- Built a library of highly reusable form components and dynamic data tables featuring robust server-side pagination and filtering.
- **Rapid Prototyping & Client Demos**
Tech Stack: React, React Three Fiber (R3F), Three.js, TypeScript, WebGL
- Developed an interactive 3D product configurator prototype for a major furniture retailer, serving as the core technical demo that secured a high-value project contract.
- Delivered multiple high-fidelity, interactive 3D and motion demos to communicate technical feasibility, performance metrics, and design potential directly to enterprise stakeholders.

Andersen — Frontend Engineer

Lviv, Ukraine

Completed Andersen's Frontend Engineering Internship focused on React, Next.js, and TypeScript. Contributed to internal projects and participated in code reviews.

Eurocredit Bank (NadraBank Branch) — Lead System Administrator

Lviv, Ukraine

- Managed IT infrastructure across 50+ service points in the Lviv region.
- Led system upgrades that later became the reference standard for other NadraBank branches.
- Coordinated network security, backups, and hardware maintenance.

🎓 Education

Master of Computer Science (MScS), Lviv University of Trade and Economics, Lviv, Ukraine
